You may also pay with
your Visa or Mastercard.

IN GENERAL

We stock a large selection of Furniture and Auto upholstery fabrics and vinyls
at tremendous savings for our customers.

In addition to regular patterns we also maintain one of the largest selections
of closeouts and promotional fabrics and vinyl in the southwest.

We also stock and maintain one of the largest selections of upholstery supplies
in the southwest for the Furniture and Auto Industries.

WE APPRECIATE YOUR BUSINESS!

* SPECIAL NOTICE

* Our catalog is published every 2 years and is meant to be a general guide.
Products and prices are subject to change. Please call to confirm current pricing.

Extra FIRM HEAVY - SHEETS (2250) Blue

Super Foam - Will not deteriorate

2" x 24" x 98"

4" x 24" x 98"

Density = The weight of one cubic foot of foam. Density affects the foams ability to provide support, comfort and durability. Generally, as foam density increases, durability also increases. Some of the factors related to durability are a loss of firmness (flex fatigue) causing dishing and bagging.

ILD = Indentation Load Deflection, is the measurement of the load bearing capacity of foam. It is measured in pounds. It is the force (in pounds) required to compress a sample of foam a certain amount. The higher the number the greater the force needed to compress the foam, therefore the firmer the foam.

This Number

Density in pounds per
cubic foot. (1.8 pounds)

GENUINE LEATHER

(CALL FOR PRICES)

CUTTING INSTRUCTIONS FOR GENUINE LEATHER

A hide of genuine leather is nature's product and caution must be exercised in cutting one. The above diagram shows various areas of a hide and they are cut as follows:

Section A should be used in cutting seat tops, inside backs, cushion bands and other sections that will receive the most strain and flexing. Section A is the prime portion of a hide.

Section B should be used for outside arms, backs, hidden bands or any other parts of furniture that receive little or no flexing. The flank sections must be used on outside backs and non-wearing surfaces in order to avoid trouble. Flank fibers run generally in one direction as indicated by the arrow. In applying flank sections to a chair, the first pull should be taken in the direction of the arrow. A stretch at right angles to the direction of the arrow may cause the finish to crack.

COLOR VARIATIONS

It is important to bear in mind that all of the leathers shown on this card are hand finished. Many of the colors shown are mottled two-tone leathers and in a small sample it is not possible to portray the color variation and shadings which occur in hand padding or glazing of such leathers.

OEM Leather

CONVERSION TABLE- LEATHER TO FABRIC:

SQ. FT LEATHER	(50-54") FABRIC
17 Sq. Ft.	1 Yard
34 Sq. Ft.	2 Yards
51 Sq. Ft.	3 Yards
68 Sq. Ft.	4 Yards
85 Sq. Ft.	5 Yards
102 Sq. Ft.	6 Yards
119 Sq. Ft.	7 Yards
136 Sq. Ft.	8 Yards
153 Sq. Ft.	9 Yards
170 Sq. Ft.	10 Yards

HOW TO CARE FOR LEATHER:

No upholstery material is easier to care for than modern leather. Dust it, wipe it occasionally with warm water and mild soap. The natural oils are sealed in. Buffing with a soft cloth is all the polishing it will need.

UPHOLSTERY FABRIC CARE AND CLEANING INSTRUCTIONS

Vacuum or brush away loose dirt before it becomes embedded in the fabric. Clean up spills and stains right away. The longer soil and stains stay on the fabric, the harder they are to remove.

Scotchgard Protector (and other similar finishes) was not developed for use as a waterproofer, but to provide resistance to water-and-oil-based stains. Even with a protective finish, upholstered furniture needs regular care to keep it at its best. Quickly blot up stains or spills with an absorbent cloth, facial tissue or sponge. Be careful not to rub the stain deeper into the fabric. If the spill is solid or semi-solid (like butter or catsup), remove the excess by gently lifting it with a dull knife.

Often, gentle blotting will remove all traces; but if the stain cannot be removed completely by blotting, use the appropriate spot cleaning technique.

Your furniture may be labeled with the voluntary industry cleanability code. Since the dyes or backings on some upholstery fabrics will be affected by water or spot cleaners, the cleanability code tells which cleaning method is safest for your fabric. If the furniture is not coded, test the fabric for damage or color change on a hidden part of the furniture before spot cleaning. The code is as follows:

- (W) Use only water-based cleaning agents or foam. Mix 2 tablespoons ammonia or ammoniated detergent to a quart of water. Wipe the stain gently with a cloth dampened with this solution. Continue, turning the cloth so you're always using a clean portion.
- (S) Use only mild, pure, water-free dry cleaning solvents, such as Energine or Carbona. Wet a cloth with the spot cleaner and follow the same procedure as described above.
- (WS) Either of the above methods may be used.
- (X) Clean fabric only by vacuuming or light brushing to remove soil. Do not use liquid cleaning agents of any type.

The furniture industry recommends professional cleaning when overall cleaning is necessary. The cleanability code should be called to the attention of your professional cleaner.

BAILEY'S FABRIC & SUPPLIES, INC.

YARDAGE/LEATHER ESTIMATOR

The figures represent the approximate yards of 54" material and square footage of leather based upon 1 YD = 18 Sq. Ft. needed to upholster the type of furniture shown.

With small hides, cutting pieces should be specified to obtain square footage. As a rule of thumb, when ordering custom sofas, order approximately 2' : YDS/45 S.F. per linear foot.

LEATHER/SUEDE CONVERSION TABLE

1 YD. = 18 S.F.
2 YDS. = 36 S.F.
3 YDS. = 54 S.F.
4 YDS. = 72 S.F.
5 YDS. = 90 S.F.

6 YDS. = 108 S.F.
7 YDS. = 126 S.F.
8 YDS. = 144 S.F.
9 YDS. = 162 S.F.
10 YDS. = 180 S.F.

11 YDS. = 198 S.F.
12 YDS. = 216 S.F.
13 YDS. = 234 S.F.
14 YDS. = 252 S.F.
15 YDS. = 270 S.F.

16 YDS. = 288 S.F.
17 YDS. = 306 S.F.
18 YDS. = 324 S.F.
19 YDS. = 342 S.F.
20 YDS. = 360 S.F.
21 YDS. = 378 S.F.
22 YDS. = 396 S.F.

1 YD = 36" X 54" = 1944 Sq. in. ÷ 144 Sq. in (12" X 12") = 13.5 Sq. Ft. — Order 18 Sq. Ft. — Diff. = Loss Factor.
